Metropolitan Planning and Development Plan
Montreal Metropolitan Community (MMC)

Created on January 1, 2001
14 RCM, 82 municipalities
Covers 4,360 km²
Less than 1% of Quebec’s territory
49% of Quebec's population and labour market
53% of GDP
56% of Quebec’s venture capital
58% agricultural zone

By 2031:
320,000 new households
530,000 new people
150,000 new jobs
GHG Compensation Program
Carbon Exchange

• Acquisition of 99,109 carbon credits covering the 2011 to 2013 compensation periods ($681,777) and the major eco-responsible events of the City of Laval ($20,000) for a total of $701,777.

• Following the acquisition of carbon credits for compensation under the program in 2011, 2012 and 2013, $877,670 will remain, which corresponds to the amounts collected in 2014, 2015 and 2016 (projected) under the GHG Compensation Program.
Subsidies for citizens

Energy efficient toilets
The City of Laval provides a subsidy of between $60 and $75 to citizens who replace their old toilet with an energy efficient one.

Rain barrels
The City of Laval provides a subsidy for the purchase of a rain barrel. The subsidy is equal to the purchase price before taxes up to a maximum of $70.

Backyard composter
The City of Laval provides a subsidy for the purchase of a backyard composter. The subsidy is equal to the purchase price before taxes up to a maximum of $50.

Cloth diapers
The City of Laval provides a subsidy of up to $200 to Laval families for the purchase of a pack of 20 cloth diapers.

Tree planting
If you own one or several residential dwellings in Laval, the City of Laval provides subsidies if you plant trees on your property.

Converting from oil heating to electricity
In the works. $1000
50,000 hours saved. 13 million km driven. 3% less GHGs.
